

FOLIO

Global Quota Challenged by Students' Union

At the outset of the open portion of the 10 August meeting of the Board of Governors, Students' Union President Floyd Hodgins moved that the motion passed 13 April by the Board of Governors regarding the imposition of a global enrolment quota, that is, that new admissions to the first year in Session 1984-85 be equal to the first-year intake in Session 1982-83, be rescinded.

Mr. Hodgins contended that the ac-

tion was taken too late in the school year for any of the affected Grade 12 students to do anything to improve their high school marks, that the raising of the admission average broke an "ethical contract" implicit in the publication of the *Calendar* as a statement of what is required for admission, and that, under the terms of *The Universities Act*, first-year admission standards and policies are to be approved by the Universities Co-

ordinating Council (UCC). Mr. Hodgins questioned whether UCC had given the appropriate approval.

President Horowitz said that the matter had been discussed thoroughly by the UCC Executive and that this is the first time that basic admissions policy had been revised after the publication of the *Calendar* for a particular academic year. (Ed. note: It is the University's position that the *Calendar* represents policies in effect

or decided upon *at the time of publication*.)

The decision by the University to limit enrolments was based on the projected number of applicants vs. the ability to cope with burgeoning registrations in Session 1984-85. The President was happy that all completed applications demonstrating an average of 65 percent or better would result in admission to the University next month, previously established quotas aside. However, problems could still exist for students seeking admission for January 1985. Thus, in the event the Board failed to rescind the 13 April resolution, the President urged the Students' Union to proceed with its suggested legal action to block application of the global quota.

The Students' Union then proceeded to make applications to Mr. Justice McDonald of the Court of Queen's Bench. Argued by Gordon Wright and responded to by Phil Clarke on behalf of the Governors, the Students' Union suit was unsuccessful. In making its administrative decision about the size of the University, the Board of Governors acted within its legislated authority and did not have to seek approval from the Universities' Co-ordinating Council.

erage would be guaranteed admission to the University. Students who expected to gain between 65 percent and 71.9 percent were still encouraged to apply in that they would be admitted according to their academic standing. (High schools had already been informed that students with less than a 65 percent matriculation average would not be admitted because of enrolment pressures.)

"This was the first year that the University has had any experience with a global quota," Dr. Horowitz said. "I am very pleased that we have been able to admit applicants with a 65 percent average or better." The University received applications for admission to first-year programs from 8,359 prospective students. Of these, some 5,000 will be admitted (including transfers from Alberta colleges—such students having less than the five full course credits allowing them access to second-year programs and at least another 220 non-matriculated students). Another 1,920 applicants were rejected because they did not meet the advertised admission requirements and a further 1,537 students were not considered for admission because their applications were incom-

plete. These students met the application deadline but had not yet arranged to have their documentation sent to the University. (They are encouraged to do so immediately since a few additional students will likely be admitted for September and January as places become available.)

Following registration in early September, the University's application of a global quota for admission to first-year programs will be reviewed in light of this year's experience. Procedures will be put into place quickly to allow as much notice as possible for prospective applicants.

In conclusion, President Horowitz also pointed out that the Province of Alberta allows many opportunities for education at the post-secondary level. "There is an excellent college system in place in Alberta and, in addition, we are unique in that we have a university here, Athabasca University, that is committed to a policy of open admissions. I would strongly encourage students who have failed to gain entrance to the University of Alberta to consider the other options that are open to them." □

University to Admit 5,000 New Students

Approximately 5,000 students will be admitted to first-year programs beginning next month. All students whose applications were complete as of 10 August and who gained 65 percent or over as a matriculation average whether by high school assigned marks or through the results of the province-wide diploma examinations have been admitted.

As was the case in the past, a few Faculties such as Pharmacy and Business have individual quotas and as a result have established admission requirements higher than 65 percent. With this number of first-year students, the University is anticipating a record enrolment for the fall.

In making the announcement, President Horowitz pointed out that more students than the global quota of 4,500 established in April 1984 were admitted in anticipation of the small number who, as experience has shown, fail to turn up for registration.

The quota of 4,500 new admissions to first-year programs was established earlier this year as a result of the pressures placed on the University by burgeoning enrolments. At that time, it was decided that students with 72 percent or over as a matriculation av-

Other Matters

- The Department of Electrical Engineering will sponsor a company called the Laser Applications Science and Engineering Research Institute.

Sorry!

High tech has its moments, and when the "system" goes down, so does *Folio*. Our apologies for the delay.

The purpose of the Institute is to provide, on a commercial basis, consulting services, information, technical assistance, training programs, development facilities and on-going research and development with respect to lasers and their application to situations, products and processes.

According to C.R. James, Chairman of Electrical Engineering, the Institute will be a parallel organization to the Alberta Microelectronic Centre. The Institute has no space requirements or financial implications for the University.

• The Vice-President (Academic), acting under GFC-delegated authority, has approved the establishment of a Social Science Archive, sponsored by the Department of Sociology. Such a research resource would contain papers of noted social scientists, plus other relevant unpublished sources, for the study of the work of individuals whose ideas have had a broad impact in the social sciences. There is no request for additional funds or space.

• T.L. Burton has been reappointed Chairman of the Department of Recreation and Leisure Studies and M. Schachter has been reappointed Chairman of the Department of Physiology. Dr. Burton's term, which began 1 July 1984, is for five years; Dr. Schachter's term expires on 30 June 1985.

- The Department of Industrial and Legal Relations is no more, the Board's Educational Affairs Committee having approved a proposal from the Faculty of Business for dissolution of the department by 1 July 1984. (Industrial Relations positions and courses have been transferred to the Department of Organizational Analysis and Legal Relations positions and courses have been transferred to the Department of Marketing and Economic Analysis.)
- The Board will grant the Students' Union \$91,000, on a global basis, to assist with the operation of a number of organizations, including the Students' Union Housing Registry, Students' Union Examination Registry,

Student Help, Students' Orientation Services (SORSE), CJSR-FM Campus Radio and the *Gateway*. The grant is for 1984-85.

- The asbestos cleanup saga has a few more chapters to go. An amount not to exceed \$1,246,800 was approved by the Governors for "further structural renovations, comprehensive renovations and asbestos correction in the Cameron and Rutherford Libraries."
- An amount of up to \$500,000 will be allocated to complete planning for renovations to the Departments of Entomology, Geology and Soil Science in the Earth Sciences Building.
- A sum not to exceed \$1,454,000 has been earmarked for the establishment of a metabolic research laboratory in

the Faculty of Home Economics. Existing laboratories will be renovated to create adequate research space for Michael T. Clandinin and staff. Dr. Clandinin is a research scholar in nutritional biochemistry who is being funded by the Alberta Heritage Foundation for Medical Research.

- For purposes of constructing a University Collections Building, the Board approved a policy of setting aside 80 percent of the funds currently in the unallocated capital interest account and 80 percent of any funds credited to that account (until such time as the Collections Building contract is awarded). □

Short-term Scholars to Receive Support

A special scholarship plan to provide support for short-term scholars from developing countries has been announced. According to Amy Zelmer, Associate Vice-President (Academic), the pilot project will be funded by the University's Endowment Fund for the Future and will relate to those students who will be at this University for a period of less than 12 months. Students eligible for the special one-time allocation may either be registered as special students or not registered as students, but following a pre-arranged program on an individual basis.

The selection committee for the project will be the President's Advisory Committee on International Development (PACID). Proposals in support of individuals should be sent to PACID and should include information on the student in question sufficient to demonstrate that he/she has the background necessary to undertake the proposed program; an indication of how the program will relate to the development needs of his/her home country; an outline of the program to be followed and an indication of a particular faculty member's willingness to supervise the program; a proposed budget; and a letter of support from the individual's employer. Applicants will be evaluated individually, according to a pre-determined set of selection criteria.

The level of support made available through the special scholarship is likely to vary, but may include airfare;

ground travel; tuition fees; food and accommodation; and additional costs such as materials, computer time, and books. Once a project has been approved, the funds will be transferred to the Briefing Centre and all disbursements will be handled by the Centre according to normal University practices.

Proposals will be received by

PACID on a continuing basis and will be approved (or not) until the fund is exhausted, says Dr. Zelmer. Although \$100,000 has been set aside for the pilot project, she anticipates that the fund may well be used up within the first year. More information on the short-term scholarship project may be obtained by contacting Dr. Zelmer, telephone 432-3213. □

Hatha Yoga Expert to Visit

B.K.S. Iyengar, who is to hatha yoga what Gretzky is to hockey, will visit campus 7 and 8 September. Mr. Iyengar's visit is jointly sponsored by the Faculty of Physical Education and Recreation and the Iyengar Yoga Association of Edmonton.

Yoga has its roots in ancient Indian philosophy and offers its followers a guide to reaching balance and harmony in their physical, mental and spiritual existence. In recent years, particularly in the Western world, greater emphasis has been placed on the physical aspect of yoga. To develop and achieve control over the body a series of exercises, the asanas, must be practiced and mastered. This process is called hatha yoga.

Among the several "schools" of yoga, particularly hatha yoga, the Iyengar method has a unique approach which stresses correct body alignment, endurance and the de-

velopment of strength and flexibility. Mr. Iyengar has developed ways of practicing the asanas which exercise every joint, muscle, and nerve, and which benefit internal organs. The basic principles of movement emphasized in Iyengar yoga are compatible with current developments in the field of physical therapy and in other modern bodywork disciplines.

Mr. Iyengar lives in Poona, India, where he trains senior students from throughout the world at the Rama-mani Iyengar Memorial Yoga Institute. This is his first visit to Canada and prior to his coming to Edmonton he will participate in the First International Iyengar Yoga Convention in San Francisco. He will be accompanied by an associate, S.V. Karandikar, who will deliver a lecture and slide presentation on 7 September to members of the medical community. □

Hands Across the Ocean

To some students and faculty from Heilongjiang University, Alberta must seem just a little closer these days. The Government of Alberta has announced the establishment of a fund to support short-term training programs at Alberta universities.

The Alberta program is to be administered by the Universities' Co-ordinating Council through its Committee on International Affairs. Accommodation, local travel and program costs (tuition) will be provided for by the fund; travel costs to Alberta will be the responsibility of the students involved and/or their sponsoring institution in Heilongjiang. Detailed arrangements will be coordinated by the University's Briefing Centre.

The proposed initiative will enable eight students to follow a three-month program which will include (a) two months of specially organized ESL instruction and orientation (at our University) and (b) one month of individually-planned observation/instruction with a Canadian colleague in a professional or academic field similar to that of the student. The Universities of Calgary and Lethbridge and Athabasca University will participate during the third month.

Attention Readers and Contributors

Due to the 3 September holiday, information for the 6 September issue of *Folio* must be received by the Office of Community Relations by Wednesday, 29 August, at 9 a.m.; paid advertisements will be accepted until 3 p.m. □

A Sponsor to be Reckoned With

The fourth annual Summer Institute on Quantitative Analysis, held on campus 11 to 22 June, was sponsored by the Population Research Laboratory, Department of Sociology, and the Department of Computing Services. The latter's sponsorship should have been recognized in an article on the Institute which appeared in *Folio*, of 9 August. □

Selection of students will be the responsibility of the authorities in Heilongjiang. The Coordinating Council has suggested that the proposed program would be most suitable for faculty who are teaching English and wish to upgrade their skills, or for those who anticipate future study in Canada and who would benefit from an intensive immersion experience prior to beginning their formal stud-

ies. Stan Munro, Chairman of East Asian Languages and Literatures, will be in Harbin next month with Alberta students taking part in a summer language training program. He will advise on the selection of students for the program. C.G. Chen, who recently spent five months as a visiting professor at our University, will act as advisor to the prospective students. Professor Chen is Vice-Chairman of

the English Department at Heilongjiang University.

According to Larry Henderson, Secretary of the Universities' Co-ordinating Council, it is anticipated that the first exchange students to benefit from the new program will likely be in Alberta during February, March and April of next year. □

'Second Skin' Author to Present E.L. Empey Lecture

The Faculty of Home Economics is pleased to announce that the second E.L. Empey Lecture will be delivered by Marilyn Horn, Professor Emeritus at the University of Nevada. The lecture, entitled "The Second Skin: Clothing and Textiles from an Ecological Perspective," will take place on 19 September at 7:30 p.m. in 2-115 Education North.

Dr. Horn, who has been very active in teaching and research, is well known for her book *The Second Skin—An Interdisciplinary Study of Clothing*. She is currently President of the Association of College Professors of Textiles and Clothing and has headed committees of this organization and of the American Home Economics Association on futures planning.

Dean of Home Economics at the University of Nevada from 1957 to 1970, Dr. Horn has written numerous articles on the philosophy and definition of the discipline.

The lectureship commemorates the many contributions Dr. Empey has made over 25 years to the profession of Home Economics, Nutrition, and Dietetics. Dr. Empey resigned as Dean of the Faculty of Home Economics in June 1976 after serving in that capacity since 1960. She subsequently retired from the University of Alberta 30 June 1978. □

A WISEST Course of Action

Since the beginning of July, 14 local high school students have been participating in the first High School Students Research Program, a program designed to breakdown the stereotyping of male and female oriented professions.

To this end, the WISEST (Women in Scholarship, Engineering, Science and Technology)-sponsored program approached area high school teachers and counsellors to recommend students for participation. Specifically, girls with a pronounced affinity for science and research were asked to submit applications, while submissions from boys with a proclivity to Home Economics were received. Once the applications were reviewed, 10 girls and four boys were chosen for the six-week program.

Six girls are assisting in research projects in physics and microbiology while the remainder are involved with the Departments of Mechanical and Mineral Engineering. All four boys are working on projects in the Faculty of Home Economics.

According to Margaret-Ann Armour, one of the coordinators of the program, WISEST wanted to let stu-

dents know that "they have another option other than the traditional male and female occupied professions." She adds that "it's important to encourage students to seek an education in the fields not usually occupied by women or men." Grade 11 students were chosen for the program because many have not yet chosen a career path. Organizers also hope that the students participating this year will go back to their schools and talk with other students about what they learned.

Dr. Armour points out that the program would not have been a success had it not been for researchers who were willing to have the students in their labs. "We are grateful to those who supported the program and who volunteered their time". □

Fund Development, University Press, Payroll Division Relocate

The Fund Development Office is now housed in 450 Athabasca Hall and the University Press address is 141 Athabasca Hall. The Payroll Division, Office of the Comptroller, has moved into 105 Administration Building.

The respective telephone numbers remain the same. □

University Professorships

The Selection Committee for University Professors will be considering nominees for University Professorships in the fall. This title honors professors whose academic, professional and community contributions have been exceptionally meritorious.

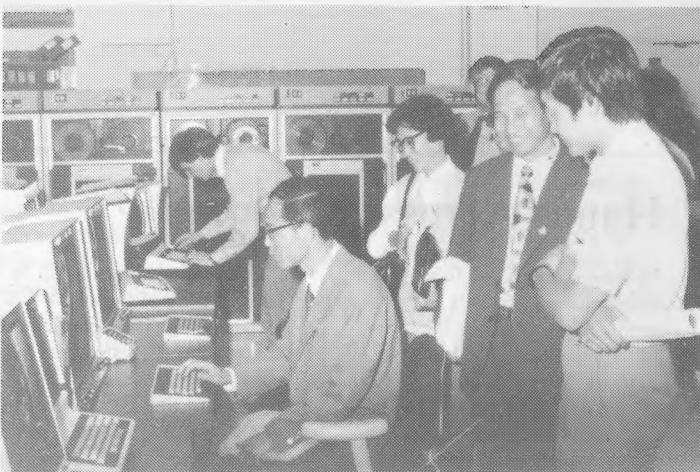

Nominations should be submitted to

the Vice-President (Academic) no later than 15 October 1984. Before making any nomination, however, people are advised to study the criteria, copies of which may be obtained from Mrs. Pamela Plaskitt, 2-5 University Hall, 432-4715. □

AHFMR Sponsors Visiting Professor

The Alberta Heritage Foundation for Medical Research is sponsoring a visit to the University by P.R.J. Burch, an internationally acclaimed epidemiologist. From 28 to 31 August, Professor Burch, who holds a Personal Chair in Medical Physics at the University of Leeds, U.K., will be a guest of the Department of Applied Sciences in Medicine.

Expert in the cause and effect of disease and author of several books and more than 200 scientific papers, Professor Burch will present four public lectures during his stay. The lectures will be held each day at noon, beginning Tuesday, 28 August. The first three lectures in the series will be

held in 2-115 Clinical Sciences; the fourth will take place in the auditorium of the Cross Cancer Institute. The variety of lecture topics reflects Professor Burch's breadth of expertise: 28 August, "A Unified Theory of Growth and Disease;" 29 August, "Does Smoking Cause Lung Cancer?;" 30 August, "Ischemic Heart Disease: Risk Factors and Cause;" 31 August, "Natural and Radiation-induced Cataracts in Mice and Men."

Professor Burch will also visit the University of Calgary, 4 to 6 September, where he will be the guest of the Department of Community Health Sciences. □

Saint-Jean's Centre for Continuing Education to be Guided by Jean Watters

The Dean of Faculté Saint-Jean, Gamila Morcos, is pleased to announce the appointment of Jean R. Watters as Director for the Centre for Continuing Education for the Faculté. Dr. Watters' career in different areas of Alberta has given him the opportunity to understand the linguistic realities as well as the needs of Franco-Albertans. His extensive experience and knowledge will give him the opportunity to better serve the interests of Albertans.

Dr. Watters, a graduate in

Andragogy from the University of Montreal, has been seconded to the Faculté Saint-Jean by Alberta Advanced Education. A grant from the Secretary of State has made this secondment possible.

The Director for the Centre for Continuing Education is directly responsible for all non-regular courses offered by the Faculté. This includes credit and non-credit courses; on campus and outreach courses; evening, spring and summer courses. □

New Wrinkles for Student Services

The beginning of the Winter Session will see the establishment of a new student services unit, the Office of International Student Affairs. The OISA will assume responsibility for all areas of international student services on campus, and oversee the operation of the soon-to-be opened International Student Centre. At the same time the Office of Student Affairs, which until now has had a major responsibility for international student services, will cease to exist and its various other functions, including student

advising, academic grievances, club registrations, mature student services, and services for disabled students assigned to an enlarged office of the Dean of Student Services.

This administrative reorganization, which will not in itself create any new services to students or reduce or eliminate any existing ones, will take place at the same time as a physical relocation of the Office of International Student Affairs and the Office of the Dean of Student Services to 300 Athabasca Hall. □

Notices

Videodisc Space Available

The Department of Computing Services is producing a laser videodisc, composed entirely of slides, for use in January 1985. Anyone wishing to archive slides on laser videodisc can do so by purchasing space on the disc at \$1 per slide. Copies of the disc will sell for approximately \$25.

Anyone interested should contact Dwight Kruger at 432-2611 before 1 October 1984.

Eaton Singers to Hold Auditions

Auditions for the Richard Eaton Singers will be held 25, 26 and 27 August in 1-29 Fine Arts Building. Times are 10 a.m. to 4 p.m. on the 25th, 1 to 5 p.m. on the 26th, and 7 to 10 p.m. on the 27th. For further information, or to schedule an audition time, call Elizabeth Pinches, Membership Secretary, at 464-4620.

Surplus Equipment

The equipment appearing in this column is available only to University Departments with University Administered Funds. For further information about the purchase of equipment or the disposal of any of your department's surplus equipment, contact Roslyn Hanchard or Roy Bennett, telephone 432-3208.

For Sale: Apple 11 64K Microcomputer.
Microfazer 64K printer buffer.
Grappler and printer interface.
2 Apple disk drives.
Zenith monitor (green).
IBM/EPSON MX-80 printer.
All the above in as new condition. Software includes: Visiplot, Visifile Screenwriter 11, Quick search librarian Graphpak (Scientific plotter and curve filter).
For more information, telephone Imtiaz, 432-2309.

Positions Vacant

The University of Alberta is an equal opportunity employer but, in accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residences.

Writer/Editor, Faculty of Business

The Faculty of Business requires an individual to write and edit various communiques, brochures, etc., destined for alumni and other members of the business community. Hourly pay based on experience and qualifications. Continuing part-time work. Send résumé to: Ms. Midge Webb-Todd, Assistant to the Dean, Faculty of Business Building, University of Alberta, Edmonton, Alberta T6G 2R6.

General Librarians

The University of Alberta Library invites applications for anticipated temporary and part-time reference positions beginning in September 1984. Qualifications required include a degree in Library Science and some experience in reference services, including bibliographic instruction and facility in computer search services.

The incumbents will be appointed at the Librarian I level, with a minimum salary of \$24,116 per annum.

Applicants should send curriculum vitae and the names of three references to Peter Freeman, Chief Librarian, University of Alberta, Edmonton, Alberta T6G 2J8.

Positions are subject to availability of funds.

Science Cataloguer

The University of Alberta Library invites applications for the position of Science Cataloguer. Qualifications required include a degree in Library Science and a science subject background. Previous cataloguing experience with AACR II and LC classification and knowledge of one or more foreign languages, specifically German and/or Russian, would be highly desirable.

The incumbent will report to the Science Cataloguing Unit Head and will be appointed at the Librarian I level with a salary range of \$24,116 to \$30,654. Desired date of appointment is 24 September 1984.

Applicants should send curriculum vitae, transcripts of academic record, and the names of three references to Peter Freeman, Chief Librarian, University of Alberta, Edmonton, Alberta T6G 2J8. Closing date is 24 August 1984.

Assistant Education Librarian

The University of Alberta Library invites applications for the position of Assistant Education Librarian in the Herbert T. Coutts (Education) Library. Major duties include reference assistance, library instruction, and collection development. Experience in reference assistance and computer searching would be an asset. Qualifications required include a degree in Library Science and a background in education or related discipline.

The incumbent will report to the Education Librarian and will be appointed at the Librarian I level with a salary range of \$24,116 to \$30,654. Desired date of appointment is 1 October 1984.

Applicants should send curriculum vitae, transcripts of academic record, and the names of three references to Peter Freeman, Chief Librarian, University of Alberta, Edmonton, Alberta T6G 2J8. Closing date is 24 August 1984.

Salary range is \$33,018 to \$49,530 (the Hay Point rating is 677).

Closing date is 28 August 1984.

Applications, with résumés and three references, are to be sent to: Dean T.H. White, Office of the Dean of Arts, 6-37 Humanities Centre, University of Alberta, Edmonton, Alberta T6G 2E5.

Non-Academic Positions

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Due to publication lead time and the fact that positions are filled on an on-going basis, these vacancies cannot be guaranteed beyond 17 August 1984. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSR.
